

Enhanced Installation Virus Protection

As we all bond together as a country and work through this virus, we want to let you know what we are doing to ensure the safety for our customers and our employees.

All our employees have their own hand sanitize gel and disinfecting cleaners, which we are providing, that they carry with them in their trucks. They know and understand the importance of using these while in your home, before and after work. They will hand sanitize each time they have to touch any doorknobs in your house. After your job is complete, before we leave, we will wipe down all surfaces to ensure they are clean and as germ free as possible.

ANY employee who feels ill is required to stay home. ANY employee who has a family member, or someone they are in contact with that is ill, is required to self-quarantine.

This is a difficult time and we understand this. We take our commitment to do our part very seriously.

I am personally monitoring each job. We don't feel like you'll need to postpone your installation but if you have any questions, contact me.

Thanks so much. Mike
